ASSOCIATE SOFTWARE ENGINEER

Associate Software Engineer with 2+ years of experience in building AI powered full stack applications, specializing in RAG, LLM platforms, FastAPI backend orchestration and React/ Next js interfaces. Recently architected and building a multimodal RAG based AI Assistant tool alongside an internal HRMS project with production level HR automation workflows.

SKILLS

Languages	Python, JavaScript, TypeScript, SQL
AI/ML	RAG, LLM Integration, Embeddings, Vector Search, Cross Encoder Reranking, Hybrid Retrieval, Agentic AI, Prompt Engineering, Vector DB, MCP Fundamentals
Backend	FastAPI, Express js, PostgreSQL, Redis, REST APIs
Frontend	React, Next js, TailwindCSS, Figma, UI/UX Design
Cloud & Tools	GCP fundamentals, Docker, Git, GitHub Actions, Postman, Swagger

EXPERIENCE

Asia Asset Finance PLC - Head Office, Colombo, Sri Lanka

Associate Software Engineer - Full Stack & AI

Feb 2026 – Present

- HRMS AI Chatbot - Developing a multimodal RAG based AI Assistant microservice for internal HRMS using Python orchestration, Qdrant vector database, Redis cache layer and LLM integration (gpt-4o/vision).
- HRMS Web & Mobile platform - Implemented automated HR workflows, contributed in database design, dashboard implementation, high fidelity wireframes and end-to-end delivery with future scalability goal.
- Mentoring & Code Review - Conducted code reviews, guide junior developers across the team.

Junior UI/UX & Frontend Developer

Mar 2024 – Jan 2026

- Custom CMS - Built a content management system using Next js, Express js, MySQL with RBAC and API first REST architecture, following SOLID principles.
- Corporate Website Revamp - Delivered a responsive vite React SPA, mobile-first website from stakeholder requirements and competitor analysis through pixel perfect development.
- AMIE Compliance Chatbot - Coordinated an external vendor to deploy an internal RAG based chatbot, owned document ingestion, accuracy evaluation and UAT on internal servers.

PROJECTS

Astrynox ERP: Designed and built a multi-tenant SaaS ERP using FastAPI orchestration, Next js interface, API first development, end-to-end workflow and deployed across managed cloud platforms (Vercel, Render, Neon), plus adding a small agentic layer with LLM integration, so users can trigger functions through in app AI Assistant.

ArgusV: An AI powered Surveillance System (Group Project) using FastAPI, Yolov8/ByteTrack object detection with GPT-4o vision-language reasoning to flag incidents in real time and streamline with mediaMTX for video streaming.

EDUCATION

BSc (Hons) Computer Science - 2028

University of Westminster | delivered at IIT, Sri Lanka

GCE Advance Level (A/L) - 2022(2023)

Royal College, Colombo
